Hindalco net up 59%; aims to cut Novelis' debt-to-EBITDA to 2.5x

STRONG QUARTER. Revenue up 39% to ₹91,708 crore in second quarter; MD Satish Pai expects coal prices to go up 5% in the December quarter on higher demand, tighter supply

Suresh P Iyengar
Mumbai

Hindalco Industries has reported a net profit of ₹7,533 crore in the September 2026 quarter, up 59 per cent from the ₹4,741 crore it posted in the year-ago period, on the back of better realisation.

Revenue increased 39 per cent to ₹91,708 crore, while EBITDA was up 42 per cent to ₹13,757 crore. Aluminium sales were almost flat at 3.45 lakh tonnes but revenue increased 33 per cent to ₹13,364 crore. EBITDA per tonne was up at $2,125.

COAL PRICES OUTLOOK

Satish Pai, MD, Hindalco Industries, said despite high coal and calcined petroleum coke prices, the company has delivered record profit on the back of an integrated business model across upstream metals and downstream value-added products.

While the aluminium upstream business registering an EBITDA growth of 55 per cent, the non-LME-linked businesses also recorded EBITDA growth of nearly 50 per cent, supported by stable operations at Novelis and a record quarter in the copper downstream and aluminium downstream businesses, he added. "We expect coal prices to increase further by 5 per cent in the December quarter due to higher demand and tight supply. The current coal inventory levels in the factory are low and the company has to buy the spot auction as the linkage supply was curtailed," Pai said.

Looking ahead, the commissioning and ramp-up of Bay Minette, copper recycling, aluminium battery foil, Aditya FRP and Inner Grooved Tubes will accelerate the share of non-LME-linked businesses, said Pai.

'REACHED THE PEAK'

The company expects its consolidated debt to have peaked at about ₹80,000 crore and is preparing to embark on a sustained deleveraging cycle, with a target to bring Novelis' net debt-to-EBITDA ratio down to 2.5x by FY31. The company expects debt reduction to gather momentum from Q3 as capex on major projects nears completion, EBITDA improves and stronger free cash flows are deployed towards repayment.

Pai said the company has more or less reached the peak now. "Debt will start coming down from next quarter. We have made a firm commitment that in Q4 the net debt-to-EBITDA will be at four [times]," he said.

The completion of the Bay Minette project-related debt commitments, coupled with improving earnings and cash generation, will aid the deleveraging, Pai added.

The debt reduction plan comes after a period of substantial investments by Novelis in capacity expansion and the restoration of its Oswego facility following the fire. The company expects incremental earnings and improved cash flows to strengthen its balance sheet.

Pai said the company's diversified business model would also support its financial performance, with upstream aluminium, downstream aluminium, copper and specialty alumina providing different earnings drivers.

GTL plans ₹3,500 cr capex, eyes 20% rise in pipeline

NEW CORRIDORS. The capex plan covers about 10 pipeline and connectivity projects, aggregating approximately 700 km

GSPL Transmission Ltd (GTL), a Gujarat-based natural gas transmission infrastructure company, plans to invest around ₹3,500 crore to expand its natural gas pipeline network, with the bulk of the investment directed towards increasing the capacity of its existing grid and extending connectivity.

"The capex plan is for the next two-three years. It is broadly divided into two parts. One is capacity expansion of our existing network, where we will be laying new and loop lines connecting existing entry and exit points. Apart from that, we will be covering new geographical areas within Gujarat," the management told *businessline* on Friday.

CAPEX PLAN

The capex plan covers about 10 pipeline and connectivity projects, aggregating approximately 700 km. This includes capacity augmentation through new and loop lines connecting existing entry and exit points, alongside the development of new pipeline corridors to expand the geographical reach.

Around 60-65 per cent of the proposed capital expenditure will be directed towards capacity expansion, while the remaining investment will go towards extending the pipeline network to new areas, the management said.

The expansion programme is expected to increase the capacity of its high-pressure grid to around 44 million standard cubic metres per day (mscmd) from the current 36-37 mscmd, as determined by the Petroleum and Natural Gas Regulatory Board. This represents an increase of approximately 20 per cent in the grid's rated transmission capacity. On funding, the company said the expansion would be largely financed through internal accruals, supported by cash balances and operating cash flows.

Gujarat Energy inks 10-year LNG deal with ADNOC

Our Bureau
Ahmedabad

Gujarat Energy Ltd (GEL), formerly Gujarat Gas Ltd, has signed a 10-year agreement with Abu Dhabi National Oil Company (ADNOC) to procure up to 4 million tonnes of LNG, with supplies scheduled to begin in 2028, as the company looks to strengthen its long-term gas sourcing portfolio.

Under the agreement, Gujarat Energy will procure LNG from the international gas portfolio of XRG, ADNOC's international investment company.

The agreement marks the first procurement of LNG molecules from XRG's international portfolio and is ADNOC's fifth LNG supply agreement in India, the company said on Friday.

The deal will be executed through ADNOC's global LNG marketing and trading platform, launched in Abu Dhabi Global Market in July 2026, which is targeting 47 million tonnes per annum of marketable LNG beyond 2030. "This agreement with Gujarat Energy strengthens ADNOC's long-standing energy partnership with India. It represents the first sale of molecules from XRG's international portfolio, reinforcing our commitment to delivering reliable, long-term LNG supplies," Rashid Al Mazrouei, Chief Marketing and Origination Officer (LNG), said.

For Gujarat Energy, the agreement is expected to strengthen supply security for its expanding customer base, which includes industrial, commercial, domestic and automobile consumers.

"Natural gas is central to driving India's shift toward cleaner energy, acting as a crucial lower-carbon option that boosts industrial efficiency, offers households a safer cooking fuel, and accelerates the growth of eco-friendly transportation," MD Avantika Singh Aulakh said.

Gujarat Pipavav Port delays commissioning of liquid jetty

Avinash Nair
Ahmedabad

Gujarat Pipavav Port Ltd (GPPL) has pushed back the commissioning of its three-million-tonne liquid jetty by three to four months from the earlier December 2026 timeline, citing delays in the overall construction of the project.

"The berth will be commissioned roughly by the end of March or early April next year," Girish Aggarwal, MD, said during an earnings call with investors. Explaining the change in schedule, Aggarwal said the delay was related to the overall construction of the jetty.

The jetty is a key part of GPPL's plans to expand its liquid cargo handling business, with the company expecting volumes to rise sharply over the next three financial years, driven by LPG, ammonia and petroleum products.

According to Aggarwal-,GPPL expects to handle around 1.4 million tonnes of liquid cargo in FY27, with volumes projected to increase to 2.6 million tonnes in FY28 and 3-3.5 million tonnes in FY29.
